

NPHIES Vendor Liability/Agreement - Status

NPHIES Vendor Liability/Agreement - Status for Counsel

Status: unconfirmed, gated behind Academy-login material. Source: HUMAN_CONFIRMATION_NEEDED.md G9.

What's confirmed

No public primary source (CHI, Saudi Insurance Authority, NPHIES IG) requires a vendor to carry professional-indemnity insurance, post a bond, sign a separate indemnity undertaking, or sign a distinct vendor DPA/NDA/code-of-conduct with CHI/NPHIES beyond the portal ToU (06-nphies-tou-business-risk.md). Same for any post-certification ongoing compliance/ re-certification/de-listing regime. But the actual System Vendor Certification pack is Academy-login-gated (course #11, "System Vendors Onboarding Course") - absence in public sources is evidence of gating, not evidence the requirement doesn't exist.

One correction on file: an earlier research pass's claim that provider-contract-suspended is a vendor de-listing mechanism is wrong - it's a siteEligibility CodeSystem value describing a provider<->payer contract status, unrelated to vendor compliance. Don't cite it as a vendor-risk fact.

Current blocker

Academy registration itself is broken as of 2026-07-21 (docs/post-CR.md A2 - CR-number validation error on v-academy.nphies.sa/register/complete, escalated to NPHIES support, reply expected 2026-07-22). The actual vendor agreement content can't be reviewed until that's resolved and the course material is accessible.

What to do

1. Wait on Academy access (tracked in post-CR.md, not duplicated here).
2. Once accessible: pull the actual vendor certification pack content and bring whatever agreement/liability terms it contains to counsel alongside the rest of this folder - don't sign anything from that pack without the same review this folder's other items are getting.
3. Questions 6-8 already sent to onboarding@chi.gov.sa via Email 2 ask this directly - no new contact needed, just tracking whether either channel (Academy content or the email reply) answers it first.
